

# Roadrace Transponder Requirement

---

AHRMA National Historic Cup Roadrace events utilize MYLAPS transponders for timing and scoring. We have selected MYLAPS based on several considerations, which include performance experienced by other racing organizations and integration with our SeriesTracker online registration and event-scoring software.

The MYLAPS transponders compatible with our scoring system are: *Bike Classic*, *Bike Flex* and *Bike Direct Power*. Any one of these models is to be mounted vertically (pin pointing upward) on either fork leg, no more than 42 inches off the ground

To order, call MYLAPS at 678.816.4000, or use the “Store” tab on their website homepage at [www.mylaps.com](http://www.mylaps.com).

MYLAPS is the world’s leader in transponder-based automatic timing and scoring systems. Since 1982, they have been “the source” for timing systems for sports ranging from RC-car racing to auto racing, horse racing, speed skating, cycling, athletic sports and more.
