

With the introduction of the X2 Transponders, we made yet another step in the world of transponder timing. The new generation transponder introduces several new benefits but more important: it is ready for the future. With the upcoming release of X2 Link, scheduled for this year, it will enable a wide range of new options.

Registration and activation of transponders

We fully understand that with the X2 Transponder several transponder types are now available, which all require a slightly different way of registering and activating. Please see the information below for some help with how to register which transponder.

- [X2 Transponders](#)
- [FLEX Transponders](#)
- [Classic/Rechargeable Transponders](#)

X2 Transponders

The new generation MYLAPS transponders, available for all types of motorized sports.

- [Login](#) to your MYLAPS account or [create an account](#) at mylaps.com
- Click “My products” and register the X2 Transponder
- Download and install [MYLAPS Connect software](#) and follow the steps on your screen to activate the transponder

This video will guide you through the process:

FLEX Transponders

FLEX Transponders work with a subscription that needs to be activated.

- [Login](#) to your MYLAPS account or [create an account](#) at mylaps.com
- Click “My products” and register the FLEX Transponder
- Download and install FLEX Manager software
- [on mylaps.com](#)
- Activate the transponder via the cradle

Classic/Rechargeable Transponders

MYLAPS Classic Transponders do not require activation to work during races, but to see all results online we encourage you to register them online.

- [Login](#) to your MYLAPS account or [create an account](#) at mylaps.com
- Click “My products” and register the Classic Transponder

We hope this overview will help you. Still, if you have any questions, please don't hesitate to get in touch.
